MEDIA RELEASE

23 OCTOBER 2008

“Rental Express goes live with Agentplus”

RUN Corp Ltd today announced it had transitioned prominent Queensland agent Rental Express to use its Agentplus branded back-office technology and trust accounting solution.

RUN Corp CEO Mr Rob Farmer said that “as previously announced, the business has focused considerable time and effort in enhancing its advanced IT systems, and has packaged an offering that enables other Real Estate Agents to benefit from its investment.”

“We are very pleased to be working with an organisation as progressive as Rental Express. With approximately 2,000 properties already under management across Brisbane they are serious about delivering a better solution to their customers and continuing to grow their rent roll”, Mr Farmer said.

Rental Express Director Mr Chris Rolls said “as one of the largest property management businesses in Brisbane, we are always looking to grow our business and provide a better service to our owners. The Agentplus solution is the answer to many years of working with average applications and bolt on systems that did not scale, integrate or provide adequate visibility of our rent roll”,

“We want to be a cut above the average agent and we are delighted with the opportunity to work with a leading edge company who sees the future of Property Management in technology, systems and procedure as we do” Mr Rolls said.

Mr Rolls said “The Agentplus solution offers world class property management software and trust accounting services that will allow us to grow our office network easily, we can focus on our core business rather than worrying about end of month reconciliations or database back-ups”

About Agentplus

Agentplus provides Real Estate agents with a back-office solution including technology and trust accounting services, so they can focus on their core business.

Key features of the solution include:

- Allowing the agent to provide a superior service to their clients with benefits such as fully web enabled owner access and immediate rental payments.
- Enabling the Property Management team to become more efficient without worrying about the back-end tasks, allowing them to focus on building stronger relationships.
- No software upgrades or backups to worry about - always have the latest version and secure data.
- The ability to quickly and easily grow the Property Management business across multiple sites.
- Extensive/comprehensive operational and financial reporting
